
$t = 0.25\,t_s$
$t = 0.5\,t_s$
$t = 0.75\,t_s$
$t = 1.0\,t_s$
Slip, $\delta\,\mu / (f\,\Delta p\,h)$
Distance, $x/L\,(t_s)$
Normalized slip, $\delta\,\mu / \left(f\,\Delta p\sqrt{\alpha' t}\right)$
Normalized distance, $x/R\,(t)$
